

## Veneer Collection 2018

The TOPAKUSTIK products are available in all customary types of wood. The veneers are processed for each project in order to obtain the most even appearance possible for color and pattern. Further, the veneer appearance is influenced by the cut and the composition of the veneers. Since wood is a natural product, the matching of the veneer must be done in connection with each individual project.

### Natural wood veneer

	max. length	ideal length
Oak	4080 mm	2780 / 3030 mm
Beech	4080 mm	
Birch	3300 mm	
Maple Europe	4080 mm	
Maple VS	4080 mm	
Cherry VS	4080 mm	
Ash	4080 mm	
am. NutTree/Walnut	4080 mm	

and many other types of wood... see [www.topakustik.com](http://www.topakustik.com)

NH veneer Collection 2018

## Natural wood veneer

Genuine wood veneer is a natural product and will always exhibit individual features and character marks. Grain patterns and color vary from tree to tree or even within a tree. TOPAKUSTIK® and TOPPERFO® products are manufactured project-specific to achieve the asked look.

					
Quarter cut + half crown cut	Random matched	Quarter cut slip matched	Quarter cut book matched	Crown cut slip matched	Crown cut book matched
Advantage: uniform impression for whole project			Disadvantage: not uniform impression for whole project		

Different lengths of planks and panels:  
The choice of the veneers is tailored to the length of the plank or panel. Different veneers may be used for various lengths. If the entire project needs to be manufactured using the same veneer, that needs to be specified as a condition.

Rift veneers (sliced veneers or true quarters) on panels:  
joining rift veneers on the bias is not advisable with certain types of wood such as maple or cherry as the appearance of the veneers becomes striped. We recommend random match veneering = our ‚Random matched‘ range.

## Wood veneer ‚Colour Collection‘

Veneer of the ‚Colour-Collection‘ is dyed genuine wood veneer. The wood is dyed completely to obtain harmonic veneer color. The length of color wood veneer is limited. Further information regarding size can be obtained from the front page.
